

## SeamFil

SeamFil is a hard-curing liquid plastic used to fill joints and cracks in plastic laminates. Perfectly matched to laminate colors, it will hide defects and enhance the appearance of any installation. Packaged in one ounce tubes, SeamFil colors can be mixed on the job, or ordered to match any color. After the countertop or laminated component is installed, SeamFil is applied to hide the joints. It dries hard, becoming a permanent part of the laminate surface. SeamFil resists moisture, detergents, and other household products. In addition to standard joints, SeamFil works very well on cracks, chips, and other imperfections where the dark substrate is visible. Properly used, SeamFil will hide defects beautifully for the life of the counter.

SeamFil is available in 20 standard colors which can be mixed to match any laminate color. For those who prefer to save the labor involved with mixing colors, we offer quick delivery on any special SeamFil color. A mixing charge is added to each special color ordered, however there is no minimum. Simply order by laminate name, color name and color number.

### SeamFil Clear Gloss 943 SeamFil Retarder 944

Squeeze Clear Gloss into the color mix to give your touch-up the luster of the original laminate. A few drops of Retarder in the mix will allow enough time to get a perfect match. Both are packaged in one ounce tubes.

### SeamFil Kits 2201 2202

The Standard and Woodgrain SeamFil Kits contain 12 colors (see chart below), a specially polished putty knife, 1/2 pint of SF99 Solvent (99HP) and complete instructions.
