

Butcher Block Tops

Selected hard rock maple butcher block tops come cut to your exact specifications. Length, depth, bumpouts, rounds, miters, clipped or radius corners all available 1-1/2" thick (accepted tolerances +/- 1/16"). Special sized blocks can be manufactured to almost any size. Standard lengths are 6" to 144". Maple gourmet blocks 120" x 36" maximum. All edges and corners come radius. For square edges or corners please specify. Reversible tops where the bottom side is exposed are available. Standard blocks contain occasional knots and voids on bottom side. All tops are coated with natural danish oil finish which requires no maintenance. However, if using block as a true cutting surface, occasionally lightly reseal the cutting surface only with mineral oil. To provide an even longer lasting finish to new non-cutting surface blocks, waterbased polyurethane may be applied after installation. See polyurethane manufacturer's directions. Refinish all cuts, sink holes extra. Two year warranty (receipt required). Tops may be ordered unfinished, but warranty becomes void.

Maple Gourmet G18TOP G25TOP G30TOP G36TOP G42TOP

An interactive design of end cut blocks to form a beautiful pattern with an extremely hard surface. The color leans toward the brown side, with a mixture of light and dark pieces contained to each individual 1"x1-1/2" block.

Maple Uniblock 18TOP 25TOP 30TOP 36TOP 42TOP

Only hand selected generally white 1" strips go into fabrication of these blocks with mild color variations. Distinctive grains and character marks give these honey colored blocks a true warmth that will blend in any color scheme or kitchen cabinet woods. Some areas may naturally appear slightly darker in color than others. 100% white blocks are available.
