

T-Edge

Edgemold T-Edge is a bolder, more sensible solution for T-Edging applications. It is flexible, colorful and withstands repeated impact. T-Edge material is semi-soft to the touch and features a rich, textured surface. It is also stain resistant, U.V. stable and flame retardant. Made of durable elastomer urethane, it has 3/4" to 1-1/4" radii at the outside corners and it is antimicrobial, meaning no food trap, no bacterial growth and no water absorbancy. T-Edge has excellent tear strength, wear resistance and adhesion qualities, and installs easily to table edges, displays, counters and walls. It is offered in a choice of edge profiles and a variety of colors. Custom profiles and colors are also available. Each T-Edge order is supplied with enough epoxy adhesive for the job at no additional charge. An adhesive application gun is available upon request.

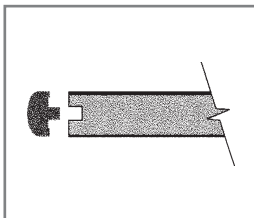

T-Edge Rectangular Profile RT15

RT15 is heavy duty T-Edge for commercial or residential countertops. Rectangular profile is 1.58" high x 7/16" thick. It is supplied in 16 foot lengths. Approximate weight per length is six pounds. Available in over 40 colors.
