Pure Metals™ Anodized Aluminum Sheets

Beautiful anodized aluminum surfaces combining the distinctive look of polished and brushed colored finishes. For wall and ceiling panels, furniture, planters, dividers, columns, signage, fascias, store fixtures, display cases and much more. They can also be bent or formed for creative rounded applications. Pure Metals™ are among the most ornate in the "stocked metals" marketplace, offering the user extreme, almost surreal visual drama and light play. 24" widths are sold in even multiples only, thickness on all items is 0.025" (0.63mm) +/- 10%. All sizes are nominal.

Metallage®

The exclusive Nevamar® line of European-influenced decorative metal laminates, designed with European artistry and flair to stand out from the ordinary. Available in 48" x 120" only, thickness on all items is 0.039" +/- 10%. All sizes are nominal. For use in internal vertical applications only. Adhesives used are the same as those for conventional laminates, with the exception of urea-based adhesives.

Metals

NuMetal™

NuMetal™ features aluminum, copper or stainless steel clad high pressure laminates in polished and brushed finishes and various embossed surfaces in a wide assortment of designs and color combinations. NuMetal™ fabricates like standard high pressure laminates and all have phenolic backing. NuMetal™, a metallic surfaced high pressure laminate sheet featuring a 48" x 96" size, fabricates like high pressure laminates. Choose from over 100 different colors and embossing combinations.

Technical Information: Polished aluminum surfaces are anodized. Brushed aluminum surfaces are lacquered. All copper is lacquered. All laminates are .035" with the exception of Dekorial Patina and stainless steel, which are .050". NuMetal™ is fabricated with the same tools used on any high pressure decorative laminate (special instructions are needed for fabricating stainless steel, please inquire). NuMetal™ products bond to various substrates - the same as other HPLs. Any contact adhesive or cold set adhesive normally used with decorative laminates is suitable. Use only naphtha or benzene as adhesive cleanup. Do not use lacquer solvents or other adhesive solvents which attack lacquer coatings. Metal laminates should be stored face up in a cool, dry area in a completely supported flat position. Use a top sheet of chipboard or similar material to hold stored sheets flat. Edge storage is not recommended. Clean surfaces with a soft cloth using household cleaners, waxes, Windex-type solutions, or ordinary soap and water. Good furniture or automobile waxes provides additional protection for all metal laminate surfaces. Fire Rating is available upon request. Many items are available in postforming grade by special order, please inquire. Counter balancing is necessary as with other high pressure laminates to prevent warping of the substrate. All NuMetal™ products are at home in any application where HPL would be used (vertical or light horizontal). The possibilities for the interior designer are endless. Signage, interiors, furniture, displays, fixtures, and more. Our stainless steel series is even used in exterior signage applications. Sample chains, technical literature, and product brochures are available. Call for additional information.

MirroFlex™

MirroFlex™ is a high impact plastic with a decorative top surface in laminate form. MirroFlex™ is available in hundreds of design and color combinations such as polished and brushed metallics, woodgrains, marbles, granites, specialty finishes and solid colors. Interior and exterior grades, vacuum formable and scratch resistant grades, first or second surface laminates, 3-D design and more available.

Standard Program: A stock 24" x 96" or 48" x 96" x .040 thick sheet program (similar to High Pressure Laminates). Finishes include all popular brushed and polished metallic finishes, many woodgrains, marbles, granites, specialty finishes and solid colors. A variety of thicknesses can be offered from .020 up to 3/4". Program exist for laminate users and vacuum formers. Both interior and exterior versions. Special coating can be added to most products to impart UV stability, scratch resistance, chemical resistance, super high gloss, and more. Use anywhere vertical HPL's would be used, imitation mirror toys, store fixtures, displays, furniture, signage, vacuum formed parts, auto, RV, boats, interior and exterior, DIY projects, musical instruments, and more.
