EuroBild™ Interior Two Component Polyurethane System EU30178 EU30278 EU30372/4/8 EU30472/4/8 EU30579 EU30679

The new Euro Series from M.L. Campbell combines the craftsmanship of European wood finishing technology with easy-to-apply characteristics. The EuroBild line is the first group of interior products available in the Euro Series. It's a popular choice for exotic woods and many upscale and high performance applications. EuroBild products come with a proven heritage too: they're based on time-tested European, 2-component technology. For you, that means a lasting, beautiful finish that always delivers superior chemical resistance, durability and full fill. EuroBild is ideal for specialized interior applications, such as: office furniture and environments, conference room tables, pub and bar environments, marine interiors, store fixtures and musical instruments. For many more specialized applications, just ask your M.L. Campbell Lacquer Specialist.

Euro X™ Exterior Finish for Shop Application

The new Euro Series from M.L. Campbell combines the craftsmanship of European wood finishing technology with easy-to-apply characteristics. The Euro X line is the first group of exterior products available in the Euro Series. Euro X offers durability and a drying time that is ideal for shop applications. Superior elasticity allows the finishes to flex with the wood's natural contractions and expansions due to changes in humidity and temperature. In addition, each Euro X offering provides excellent resistance to chemicals, UV exposure and scratches.

Euro X Clear "Wet Look" EU30878 is a clear, 2-component polyurethane for use on exterior wood when a very hard, long-lasting finish is required. Provides an excellent (high solids) finish that is scratch and mar resistant and provides excellent moisture resistance. This product can also be used for interior use.

Euro X Clear EU30974 is a 2-component polyurethane for use on exterior wood when a very hard, long-lasting finish is required. Provides an excellent (high solids) finish that is scratch and mar resistant and provides excellent moisture resistance.

Euro X Super Sealer EU31089 is based on a European style 2-component polyurethane that offers exceptional adhesion and chemical resistance. Euro X Super Sealer's high solids formula was specifically designed for exterior wood surfaces that are exposed to moisture, heat and chemicals.

Euro Exotic Woods Sealer EU32079 is specifically designed to seal oily exotic woods like teak, Brazilian cherry and rosewood to create a good adhesion base for Euro Series exterior or interior topcoats.

Euro Reducer EU31197 is a blend of special evaporating solvents specifically formulated for Euro X products.

Euro Retarder EU31297 is a blend of special evaporating solvents which are intended to correct most leveling and flow problems. Euro Retarder contains no aromatic or ketone solvents.
