

## Sealers & Primers

### AC (Acid Catalyzed) Sealer C156.10

The classic choice for a wide variety of jobs. Meets the demands of virtually any application when a catalyzed sealer is needed. 32% solids, post-catalyzed clear sealer with excellent durability and excellent resistance to water, solvents and chemicals. Easy application, fast drying high build with great sanding qualities. Air dry or bake. Easy mixing - just add catalyst.

### Krystal™ Sealer C156.11

This clear sealer is a post-catalyst, offering a water white, non-yellowing formula that is known for extended eight hour pot life. With easy application, fast drying and easy sanding characteristics, this may be the choice when you need a clear sealer. Non-yellowing, water white and non-photochemically reactive. Extended pot life, 35% solids, post-catalyzed clear sealer. Easy sanding and high resistance to water, solvents and chemicals. Easy application, fast drying, high build.

### Water White Vinyl Sealer C100.25 C115049 C117029

C100.25 is a true vinyl sealer that is specially formulated to provide superior moisture resistance, outstanding application and sanding properties and fast dry times. This high solids, non-yellowing vinyl sealer is an excellent choice for light stains when excellent adhesion and stain blocking are required. Water clear, non-yellowing. 25% solids, clear sealer. Excellent sanding characteristics. C11504 MagnaSand Sealer is a water white HAPs free pre-catalyzed 24% non-volatile (by weight) lacquer sealer with thermo set properties and used as a sealer for pre-catalyzed lacquers. MagnaSand Sealer is recommended for job shop finishing of kitchen cabinets or institutional furniture where a pre-catalyzed lacquer is needed. Can be used as a seal coat for post catalyzed finishes. C117029 is a new generation of post-catalyzed amino alkyd finishing system that offers the ultimate in durability. The Level Sealer is a high solid, water-white formula and was specifically designed for interior wood surfaces that are exposed to moisture, heat, and household chemicals. It was specifically designed to give good sag resistance and can be sprayed from 4-10 mils wet on a vertical surface, and can also be built 12-14 dry mils by allowing each coat to dry thoroughly.

### Nitrocellulose Vinyl Sealer C101.83

A modern vinyl modified nitrocellulose lacquer sealer with a unique non-stearated sanding aid. It is formulated to offer an improvement over conventional lacquer sealers where excellent adhesion, stain blocking and superior moisture resistance is required.

### ClawLock® Catalyzed Primer/Undercoater W370.9

A high performance, two component post-catalyzed (amino-alkyd) primer/undercoater for furniture, store fixtures and cabinets. Clawlock provides an excellent base coat for a high performance pigmented finishing system. Ideal for filling the open pores on MDF board, this high solids formula dries fast with no recoat window and has excellent sanding properties. Clawlock is available in white or black and can be tinted to additional colors. No HAPs solvent formulation that meets global E1 standards for formaldehyde release. Three high solids formulas available. Fast filling on MDF board with super moisture resistance. Available in white, black and other tintable colors.

### MagnaClaw™ Precat Primer/Undercoater W115749

MagnaClaw Primer/Undercoater is a HAP's free, 550 VOC compliant, fast dry, easy sanding precatalyzed primer/undercoater. It is specially formulated for use as the first coat under M.L. Campbell Precatalyzed Pigmented Lacquers. It exhibits very good adhesion on wood, particle board and hard boards. Also, has good holdout over porous surfaces such as soft wood and untempered hard board. Sands very well to produce an excellent base coat with outstanding holdout of top coats. Especially developed for filling the open pores on MDF board.

### Magnalac Primer/Undercoater W350.10

Specially formulated for use as the first coat under Magnalac Pre-catalyzed Pigmented Lacquer (will also work as an excellent primer/undercoater for other products). This fast dry, high performance nitrocellulose lacquer sands very easily to produce an excellent base coat with outstanding holdout of topcoats. Our best general purpose primer. Fast drying nitrocellulose lacquer primer with excellent sanding properties. 50% solids for fast drying and excellent adhesion. Provides good base coat on hard/softwoods. Can be tinted to additional colors.
