

### Pre-catalyzed Topcoats

#### Magnalac® Clear Topcoat C144.12 C144.14 C144.16 C144.19

Magnalac has been formulated using the finest of domestic and European technologies, to offer your customers a high performance coating system that produces outstanding aesthetics and excellent long term durability. Formulated with no HAPs solvents to help you comply with environmental regulations. Ultra low formaldehyde which meets world E-1 standards for a better work environment. Self sealing - sealer is optional. Quick drying cycle - faster cross-linking eliminates lifting problems on recoat and touch-up, common with some pre-catalyzed lacquers. Can be force dried up to 120°F to accelerate the drying cycle. User friendly - no mixing or pot life problems. Exceptional durability and resistance to water and wear by usage. Easily applied with conventional spray, airless spray, air assisted airless spray or HVLP equipment. Magnalac Clear is 28% solids - just 2-3 coats will build an excellent finish. Magnalac can be applied over M.L. Campbell Woodsong stains in one hour. Available in four lusters - gloss, semi-gloss, satin and flat. Further adjustments of the luster can be achieved by intermixing the Magnalac or using a flattening paste. Low VOC - only 664 grams per liter. Magnalac products have undergone rigorous quality testing to verify performance and application characteristics. The M.L. Campbell laboratory has formulated Magnalac products to meet or exceed the required performance levels established by KCMA for finish.

#### Magnalac® Pigmented Topcoat W365.14

Pigmented Magnalac is a premium quality, ultra low formaldehyde, pre-catalyzed nitrocellulose lacquer formulation (Amino Alkyd) that incorporates the most up-to-date European wood finishing care technology. In addition, this unique formulation contains no aromatic or ketone solvents. Supplied in a high solids, high build, fast drying formulation, Magnalac has exceptional resistance to water, solvents and household chemicals. Magnalac is a world class coating that makes available to you, the latest in high performance, long lasting wood finish technology.

#### MagnaMax™ Clear Topcoat C148.12 C148.14 C148.16 C148.18

High performance Pre-Catalyzed MagnaMax™ Lacquer is a technological breakthrough for pre-catalyzed lacquer clear finishing systems. This hi-solids water white formula was designed and developed to maximize the durability and overall performance available from pre-catalyzed technology. Common household chemicals and other harsh conditions meet their match in this high-performance, quick drying, water white pre-catalyzed lacquer. Totally HAPs free and low in VOC - only 625 grams per liter. Ultra low formaldehyde - meets European E1 Standard. 33% solids, only 2 coats required. Water white self-sealing formula with outstanding sanding properties. Excellent chemical resistance and exceptional film build. Excellent adhesion on both closed and open grain substrate. Mar and scratch resistant. Quick dry to sand and recoat times yielding increased production from fast pack and stack times. Ready to spray and easy to apply with any equipment. Low odor. Can be force dried to speed the cure cycle. Available in Gloss, Semi-Gloss, Satin, or Dull lusters. Thermoset formulation for quick "stack and pack" time. Surpasses all ASTM and KCMA testing standards. Meets AWI standard TR-4.

#### MagnaMax™ Pigmented Topcoat W297.14

High performance Pre-Catalyzed White/Opaque Base lacquer from M.L. Campbell closes the gap between pre-cat and post-cat lacquers. MagnaMax White offers the convenience and user-friendly features of pre-catalyzed lacquer, while providing improved durability and performance. This high solids, non-yellowing, thermoset, HAPs free, ultra-low formaldehyde, pre-catalyzed lacquer meets the AWI OP-4 rating for chemical and moisture resistance. MagnaMax White can be tinted to 800 different M.L. Campbell colors by your local M.L. Campbell distributor color studio. Non-yellowing brilliant white. Thermoset formulation for quick "stack and pack" time. Meets AWI OP-4 chemical and moisture resistance. Freshest pre-catalyzed coating. 120 day shelf life. Totally HAPS free and low in V.O.C - less than 600 grams per liter. Ultra-low formaldehyde. High solids for outstanding film build. Mar and scratch resistant. Quick dry to sand and recoat times. Force-dry availability. Available in 800 different colors.

5 Gallon Product No.	Gallon Product No.	Quart Product No.	Catalyst Required	Catalyst %	Description
C144.12-5	C144.12-G				Magnalac Precatalyzed Lacquer - Dull
C144.14-5	C144.14-G				Magnalac Precatalyzed Lacquer - Satin
C144.16-5	C144.16-G				Magnalac Precatalyzed Lacquer - Semi-Gloss
C144.19-5	C144.19-G				Magnalac Precatalyzed Lacquer - Gloss
	C365.14-G				Magnalac Precatalyzed Pigmented Lacquer - Satin
C148.12-5	C148.12-G				MagnaMax Hi-Solids WW Precatalyzed Clear Lacquer - Dull
