

Central Vacuum Systems

A NuTone Central Vacuum System is one of America's "most wanted" built-in appliances. Quiet, powerful and versatile, they offer convenience and value because they make cleaning every corner of your house unbelievably easy. Simply insert the lightweight hose into a wall inlet. Powerful cleaning suction begins immediately. Remove the hose and the system shuts off. Best of all, there's no cumbersome vacuum cleaner to lug from room to room or up and down stairs. And unlike conventional vacuum cleaners, a NuTone central vacuum system is a long-lasting built-in convenience that actually adds value to your home.

Power Units VX475 VX550 VX1000

Powerfully clean. Brawn wasn't sacrificed for beauty. Our new motor designs deep clean far better than conventional vacuums. And better filtration, you won't spread the dust around, either. Exhausted to the exterior of your home, the microscopic dust particles that simply scatter with conventional vacuums are ported outside. Your home is cleaner and indoor air quality is improved as well. They feature HEPA filtration, accurate bag-full lights, simplified bag removal and filter changing (for replacement bags, 3 per pack, order model # VX3918), and convenient installation.

Central Cleaning Kits VXCK355 VXCK350

Kits include combination floor/rug tool, ratcheting chrome steel wand, notched crevice tool, convertible upholstery tool, dust brush, snap-on tool caddy, cloth caddy, CT600 deluxe electric power brush, CH615 current-carrying direct connect crushproof hose and CA130 protective hose cover.
